

Contest Rules

There are a few simple, yet very important rules at LMI that allow us to stay on-schedule, maintain the integrity of our contest, and retain the privilege of using our facility for this event.

We greatly appreciate your assistance in compliance with these simple guidelines.

1. Arrive in plenty of time to get to and exit warm-up as scheduled. Your host will only notify you once that it is time to move to the staging area. You have a full 30 minutes in warm-up, 5 minutes to stage, and 20 minutes to set-up, perform, break down, and clear the field. Please plan accordingly.
2. While entering the field, an accurate count of winds will be made. That number should be within the parameters of the classification entered. Exceeding the limits of the class will automatically change your classification to the next classification above. The contest coordinator will notify the director. No announcement to that affect will be made publicly.
3. The condition of the field must be left exactly as when the competing band entered. Any debris, uniform parts, or props must be removed DURING that band's performance window.
4. ALL Pyrotechnics are prohibited by rule of the City of Alexander City Parks and Recreation division.
5. LMI personnel will oversee moving all equipment from the end zone to the sidelines. NO LAWN TRACTORS, ATV's, OR OTHER VEHICLES will be allowed on the field surface. While this may constitute a minor inconvenience, we provide as many hands as is necessary to be sure that equipment gets moved efficiently. We will have ample equipment trailers and help available. Bands may choose to move their own equipment using their own trailers and towing devices. However, equipment is staged and moved according to the performance schedule and no tow vehicles are allowed on the playing surface.

Send us your questions as they arise to brhsband@alex.k12.al.us
